

2-leg chain sling

Product Code: 0498
Availability: In Stock

Price: 35.38€

Ex Tax: 29.00€

Description

2-leg chain sling

The two leg chain sling is designed for safe lifting, securing, and transporting various loads in industry, construction, and logistics. The two strong legs ensure stable weight distribution, significantly increasing safety and precision when handling heavy loads. It is made of high-quality alloy steel, resistant to stretching, wear, and corrosion, ensuring a long service life even with daily use.

The two leg chain sling is equipped with durable hooks and reliable couplings that allow for quick and safe attachment of loads. It is available in various lengths and load capacities, in accordance with European quality and safety standards.

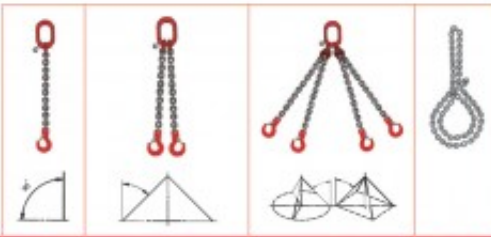

Additionally, the sling is fitted with a chain shortener, allowing quick adjustment of each leg's length as needed, increasing flexibility and safety during lifting operations.

Because of its robustness, reliability, and easy maintenance, it is an excellent choice for professional users who need a proven and efficient lifting solution.

Product characteristics:

- Material: alloy steel
- Surface: black oxide
