

Folding workbench

Product Code: 0533
Availability: In Stock

Price: ~~1573.80€~~ 963.80€

Ex Tax: ~~1290.00€~~ 790.00€

Description

The folding workbench is an excellent choice for DIY enthusiasts, craftsmen, and professionals who need a reliable work surface while saving space. Its foldable design allows for easy storage and transport, while the adjustable working height from 700 to 900 mm ensures comfortable working positions both in the workshop and on-site. It is suitable for woodworking, processing various panels, assembling door frames during interior door installation, and as a stable work surface for cutting large-format ceramic tiles. The robust construction provides a maximum load capacity of up to 150 kg, and the extendable work surface with a tilting function allows handling large workpieces up to 3100 × 2150 mm. Despite its solid build, the workbench weighs only 34 kg, enabling easy relocation and flexible use at different locations. The folding workbench combines functionality, stability, and space-saving design in one versatile solution for workshops and on-site work.

Technical Data

- Dimensions when folded (W × L × H): 1150 × 250 × 700 mm
- Minimum working surface: 1100 × 1050 mm
- Maximum working surface: 1800 × 2100 mm
- Working height (adjustable): 700-900 mm
- Maximum load capacity: 150 kg
- Maximum workpiece size (with tilting function): 3100 × 2150

- mm
- Weight: 34 kg
